

Transforming American Manufacturing

MEP Celebrates 30th Anniversary

Strengthening American Manufacturing for 30 years, MEP offers technical and business support to SMB manufacturers. Since 1988, MEP centers have worked with more than **94k manufacturers**, leading to **\$111.3b in sales**, **\$18.8b in cost savings**, helping to create and retain **985,317 jobs**.

TRANSFORMERS. MEP. AND MANUFACTURING TRANSFORMATION.

1988— It Was a Very Good Year

30 years ago, the price of a movie ticket was \$4.00—a postage stamp .24 and CDs out-sold vinyl records for the first time. In that year, table tennis became an Olympic Sport, the favorite toy of little boys was the Transformer and President Reagan signed the Omnibus Trade and Competitiveness Act, creating the foundation for what is now known as the Manufacturing Extension Partnership (MEP).

If you recall, Transformers, when introduced, were toys with a simple idea behind them. A miniature car or plane turned into an action figure—a robot in disguise. And just like MEP, Transformers owe part of their meteoric rise to President Regan as well. Under his administration, children’s television was deregulated, allowing products to become part of kid’s programming, sparking a boom in the sales of action figures like Transformers that are popular to this day.

MEP Gains a Foothold

Just like Transformers, the MEP National Network™ has gained traction over the past thirty years and has helped transform the face of manufacturing. Since 1988, MEP centers in all 50 states and Puerto Rico have worked with 94,033 manufacturers, leading to \$111.3 billion in sales, \$18.8 billion in cost savings, helping to create and retain 985,317 jobs as reported by the clients they have served.

What’s more, MEP has embraced and promoted Industry 4.0 and the advanced manufacturing technologies it incorporates, including robotics and advanced human-machine interfaces, augmented reality and the Internet of Things, to name a few.

NCMEP—Leverage our Resources

We got our start as the North Carolina Manufacturing Extension Partnership (NCMEP) seven years after the formation of the national center. We're the official representative of the MEP National Network™ and NIST MEP in North Carolina. We equip small and medium-sized manufacturers with the resources needed to grow and thrive. Our industry experts work side-by-side with manufacturers to reduce costs, improve efficiencies, develop the next generation workforce, create new products, find new markets and much more. Together, we help strengthen North Carolina communities and are helping transform U.S. manufacturing.

Manufacturing Transformation

Industry 4.0 is being lauded as the next generation production framework for the fourth industrial revolution. And we've been part of those changes, sweeping the world of manufacturing. We're involved in game changing USA Manufacturing Institutes designed to cultivate these burgeoning technologies, ranging from electronic materials and smart sensors to biopharmaceutical manufacturing.

So, if you're intent on moving to smart manufacturing and are interested in our transformation solutions that may enable you to reach and serve customers better, we've got you covered.

What is the Impact?

Our approach consistently helps companies deliver bottom line impact, retain sales, increase sales and create and retain jobs and more. Check out our partial list of clients in the following pages.

Come Grow With Us

Progress, profits and agility await. Come grow with us and imagine the possibilities the next 30 years can bring. Contact an NCMEP Partner today.

Weekly Wages

Manufacturing place it **8th** among the state's **19** industrial sectors

North Carolina

- There are **10,300** manufacturing firms in North Carolina.
- North Carolina employs 464,947 workers in manufacturing, representing 22% of the state's total private-sector economic output or \$106.7B.
- North Carolina ranks 5th in the nation for its manufacturing contribution to the national Gross Domestic Product (GDP).
- In 2017, North Carolina exported \$32.6b in manufactured goods, led by chemicals, transportation equipment and machinery.
- North Carolina manufacturing contributes 5% of total US manufacturing output
- Out of all industrial sectors, manufacturing leads the state in GDP contribution.
- The weekly wages in manufacturing place it 8th among the state's 19 industrial sectors. Manufacturing wages are higher on average than healthcare and social assistance, transportation and construction.
- Small manufacturers are the backbone of the sector. Of the 10,300 manufacturing companies in North Carolina, 80% have fewer than 50 employees and 51% have 9 or fewer employees.
